Interagency Council on Statistical Policy

National Secure Data Service

THE NATIONAL SECURE DATA SERVICE

An Overview

AMERICA'S DATA IN ACTION

✓ IMPROVING DATA ACCESS

A centralized resource will allow anyone to get assistance navigating the government data ecosystem

✓ REDUCING AGENCY BURDEN

A shared services model will create opportunities to reduce resource and financial burden on individual agencies

✓ BOLSTERING EVIDENCE-BUILDING

Novel technologies will make new cross-agency data linkages possible with the potential to unlock innovative insights

✓ HARNESSING AI FOR TRUSTED DATA

Core AI features will be trained on high-quality government data and able to answer open-ended statistical questions, while data providers and users can access tools for leveraging AI technologies

ABOUT THE NSDS

DISCOVERY & NAVIGATION OF TRUSTED GOVERNMENT DATA

Data Navigator: AI chatbot and data subject matter experts provide individualized assistance for data users

RESOURCES TO EMPOWER THE DATA COMMUNITY & BUILD DATA SKILLS

Data Usage Platform: Interactive dashboard showing how government data are being used and by whom

Toolkits: Practical guidance on leveraging data for decision-making

Capacity-Building Center: Curated set of data skills and evidence-building resources

SECURE COMPUTING FOR DATA ACCESS, LINKAGE, & ANALYSIS

Secure Compute Environment: Virtual enclave for approved users working with restricted data, featuring novel privacy-enhancing technologies
